COVID-19 DATA SUMMARY

County Projections

Projections of Hospital-based Healthcare Demand due to COVID-19

This update includes data on hospital visits and volume through Aug 3, 2020.

KEY TAKEAWAYS:

• The number of new patients with COVID-19 requiring hospitalization each day across Los Angeles County now appears to be decreasing slightly. The number of daily new cases is starting to approach the lower numbers seen in May.

• The transmission number ("R") is now estimated to be 0.91 with an uncertainty of 0.83 to 0.99. Last week the estimate was 0.92 with an uncertainty of 0.86 to 0.98.

• Based on the current estimate for R, the current number of available hospital beds and available ventilators in Los Angeles County are likely adequate over the next 4 weeks. The number of available, currently staffed ICU beds also appears adequate but is more limited and could potentially become inadequate over the next 4 weeks if R and the associated transmission increases.

HOW MANY IN LOS ANGELES ARE INFECTIOUS TO OTHERS?

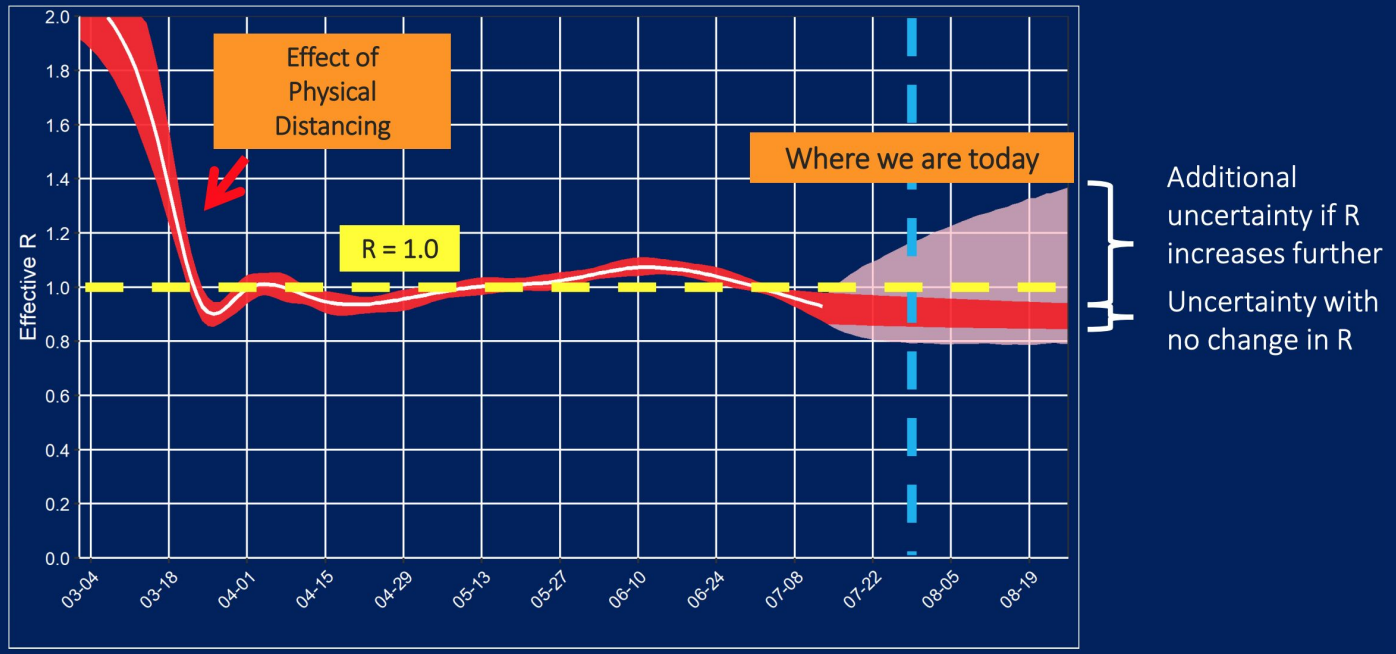
The model suggest that about 0.19% (uncertainty of 0.12% to 0.31%) of everyone in Los Angeles County is currently infected and infectious to others. This suggests about 1 in 510 (between 1 in 860 and 1 in 320) Los Angeles County residents are currently infectious to others. Last week this estimate was 1 in 450.

The projection for future ICU bed utilization is a 10% decrease from what would have been expected early in the epidemic with the same number of hospital admissions

• The projection for future ventilator utilization is a 25% decrease from what would have been expected early in the epidemic with the same number of hospital admissions

Effective Transmission Number "R"

As of Aug 3, 2020



Note: We have adjusted the R that we present to account for the fraction of the population that is presumed to be immune to reinfection. At the beginning of the pandemic, this fraction was essential zero so this would not have made any difference. But as more people have been infected, and are presumed to have immunity, we are presenting an R that includes this factor.

COVID-19 DATA SUMMARY

United States Update

COVID-19 US Cases - Per Capita State Comparisons

As of August 5, 2020, 3:00 PM

California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: **524.7K** cases in **California (+5.3K) - 1326** per 100K
9.7K deaths in **California (+202) - 24.5** per 100K

#2: **502.7K** cases in **Florida (+5.4K) - 2360** per 100K
7.8K deaths in **Florida (+225) - 36.4** per 100K

#3: **459.9K** cases in **Texas (+8.7K) - 1602** per 100K
7.5K deaths in **Texas (+236) - 26.1** per 100K

#4: **418.2K** cases in **New York State (+0.6K) - 2140** per 100K
25.2K deaths in **New York State (+4) - 128.8** per 100K

#5: **201.7K** cases in **Georgia (+3.8K) - 1917** per 100K
4.0K deaths in **Georgia (+142) - 37.9** per 100K

Rounding out the top ten are:
Illinois, New Jersey, Arizona, North Carolina, Louisiana

California ranks ...
#1 in Cases
#24 in Cases per 100K

#3 in Deaths
#29 in Deaths per 100K

COVID-19 US Cases - Per Capita County Comparison (Counties >300K ppl)

As of August 4, 2020, 8:00 PM • One day lag

Top 5 per capita (per 100K) cases by County:

Miami-Dade, Florida: 4,592 cases per 100K
(124,759 total cases)

Rockland, New York (NYC Metro Area): 4,264 cases per 100K
(13,893 total cases)

Westchester, New York (NYC Metro Area): 3,726 cases per 100K
(36,049 total cases)

Nueces, Texas: 3,537 cases per 100K
(12,813 total cases)

Passaic, New Jersey (NYC Metro Area): 3,494 cases per 100K
(17,532 total cases)

Los Angeles, California: 1,950 cases per 100K
(195,805 total cases)
Los Angeles County ranks #52 out of 229 counties with 300K+

COVID-19 US Deaths - Per Capita County Comparison (Counties >300K ppl)

As of August 4, 2020, 8:00 PM • One day lag

Top 5 per capita (per 100K) deaths by County:

New York City, New York: 282.6 deaths per 100K
(23,556 total deaths)

Essex, New Jersey (NYC Metro Area): 263.6 deaths per 100K
(2,106 total deaths)

Passaic, New Jersey (NYC Metro Area): 247.7 deaths per 100K
(1,243 total deaths)

Union, New Jersey (NYC Metro Area): 242.3 deaths per 100K
(1,348 total deaths)

Hudson, New Jersey (NYC Metro Area): 223.5 deaths per 100K
(1,503 total deaths)

Los Angeles, California: 47.4 deaths per 100K
(4,760 total deaths)
Los Angeles County ranks #75 out of 229 counties with 300K+

COVID-19 DATA SUMMARY

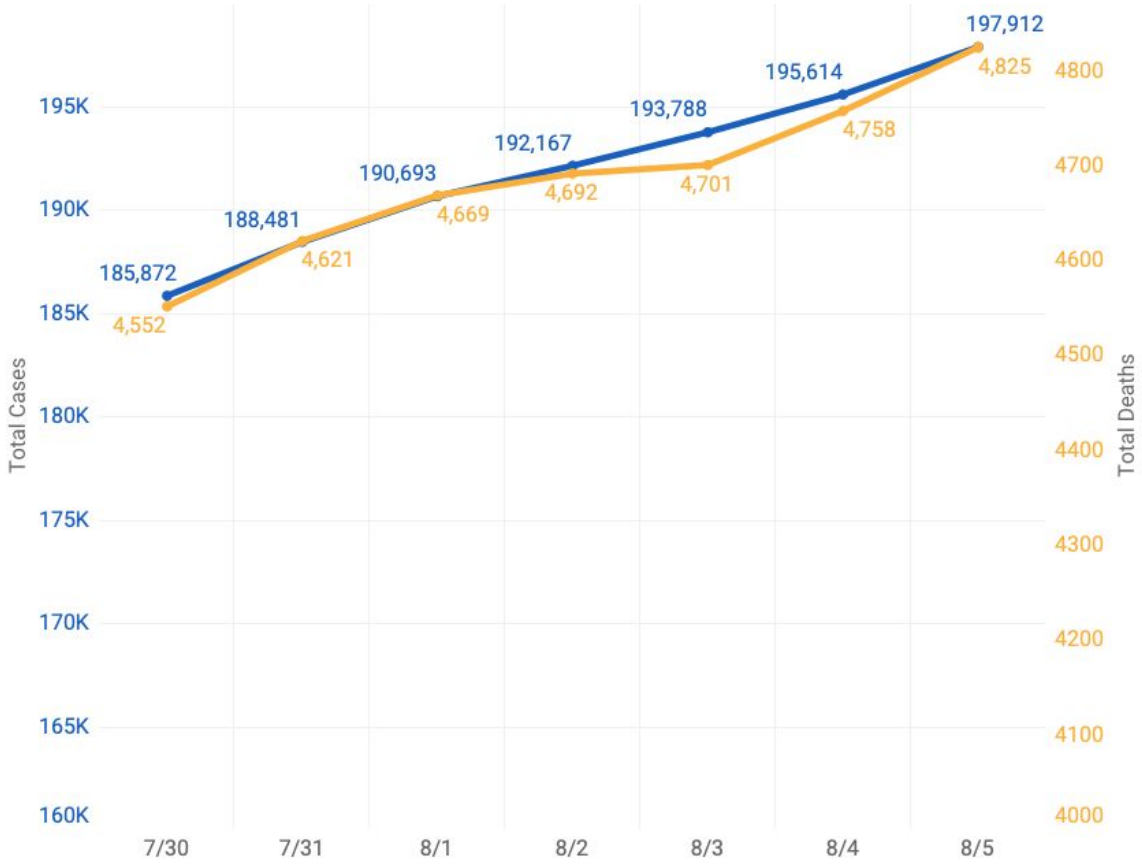
LA County Update

COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days

As of August 5, 2020, Noon

Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.91 (*ideal is <1.0)*

New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received



Total Cases
Total Deaths

Source: Los Angeles County Department of Health, COVID Tracking Project

Prepared by Mayor's Innovation Team

COVID-19 Los Angeles County Total Cases and Total Deaths, 7-Day Average

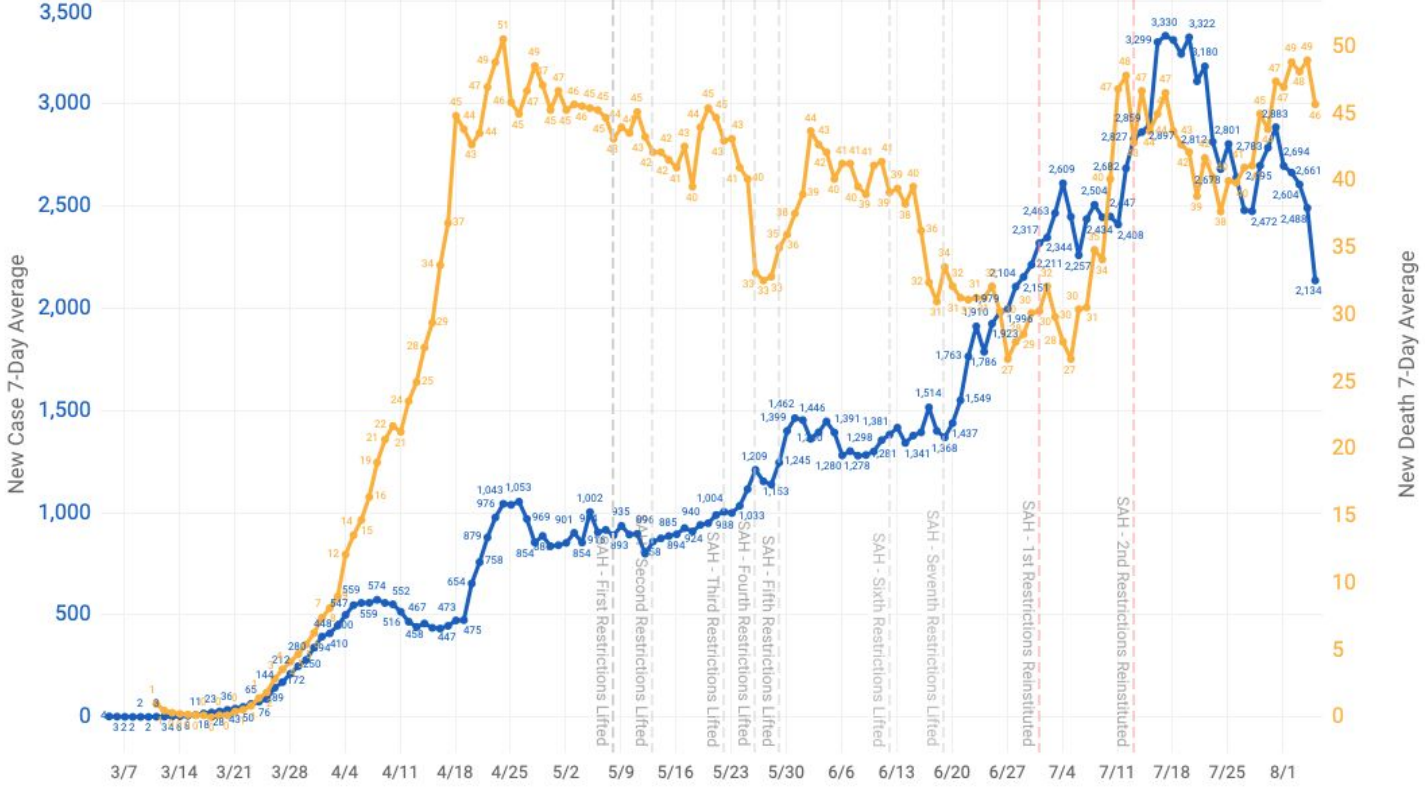
As of August 5, 2020, Noon

Key Takeaways:

The past seven days have seen an average daily increase of 2,134 new cases

The past seven days have seen an average daily increase of 46 new deaths

New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received



Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

COVID Cases and Death Demographics*

As of August 3, 2020 • Two day lag

Key Takeaways:

- Data is incomplete with 37.7% of cases and 0.4% of deaths still under investigation
- People 18-49 and Hispanic/Latinos are overrepresented in cases
- Seniors, Men, and African Americans are overrepresented in deaths
- 4,403 out of 4,758 deaths had comorbidities (underlying conditions) (92.5%)

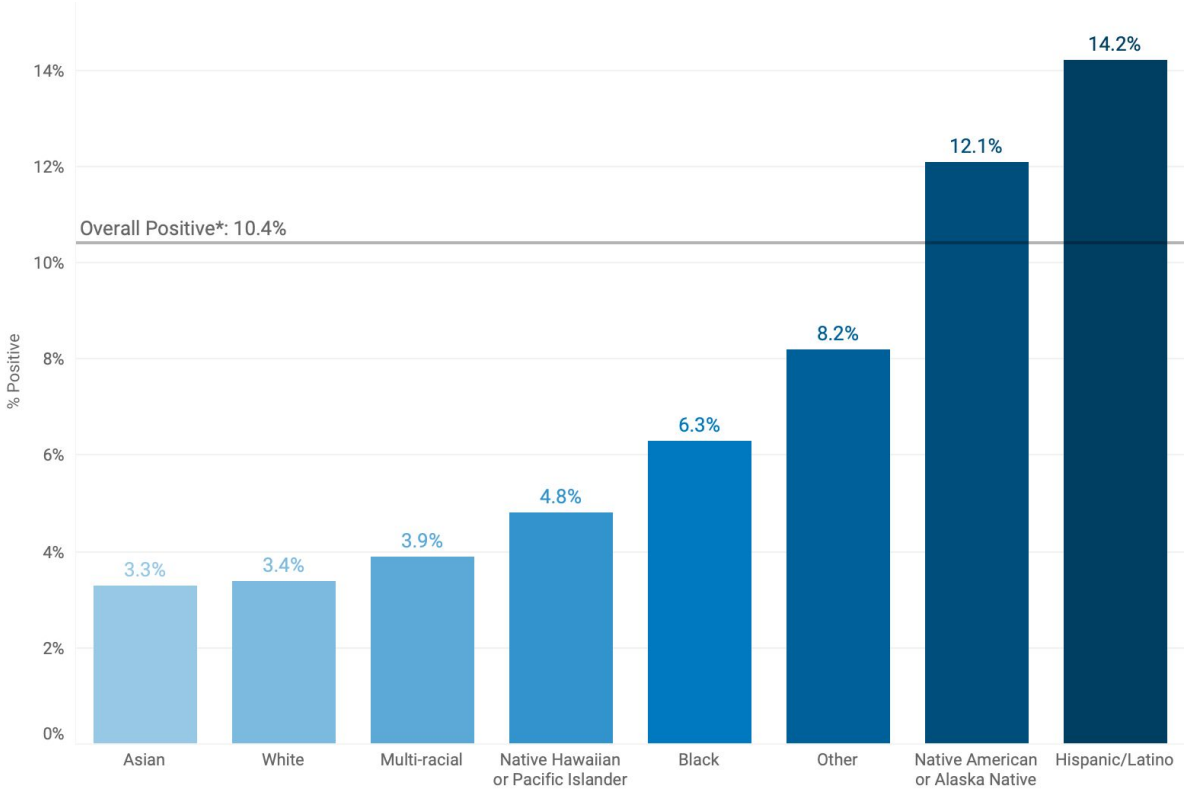
Recent LA City + County Positive Testing by Race
June 23 to July 25

Key Takeaways:
Positive Testing Rates from 6/23 to 7/25

- Hispanic/Latino—**14.2%**
- White—**3.4%**
- Asian—**3.3%**
- Black—**6.3%**
- Other—**8.2%**
- Native Hawaiian/Pacific Islander—**4.8%**
- American Indian/Alaska Native—**12.1%**
- Multi-racial—**3.9%**

- Overall Positive Rate: **10.4%**



Source: Healthvana
**Only data with complete race/ethnicity information was included*

LOS ANGELES COUNTY UPDATE

COVID Outbreaks at Non-Institutional Settings
As of August 4, 2020 • One day lag

Key Takeaways:
• Highest number of cases were identified at:

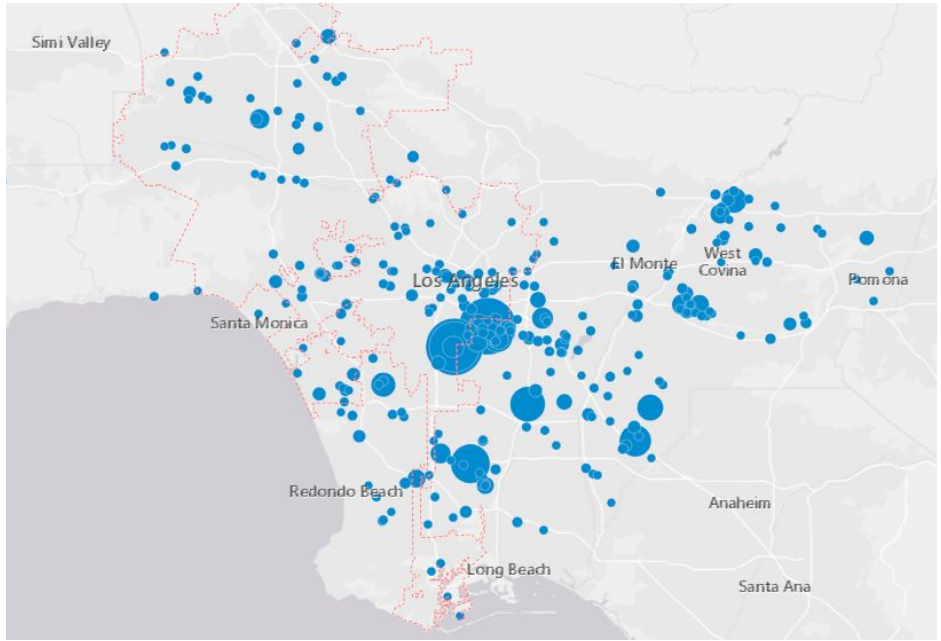
LA Apparel - 3 buildings
(384 confirmed cases overall)

Smithfield - Vernon
(241 Confirmed cases)

Ralphs Ice Plant and Warehouse - Compton (114 confirmed cases)

Within City of Los Angeles boundaries, the highest outbreaks outside LA Apparel were identified at:

Moulton Logistics Management (43 confirmed cases)
Anthony, Inc. (27 confirmed cases)



Source: Los Angeles County Department of Health

Note: the outbreak list includes Los Angeles County non-residential settings that meet the criteria of (1) five or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID19 case at a worksite, or (2) three or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a setting with vulnerable clients

COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases

City + County + State Update

As of Aug 5, 2020, Updated 1:00 PM

Key Takeaways:

- **5,295** new cases reported in CA since yesterday (**1.0%** increase)
- LA County has **37.71%** of cases in CA with **2,347** new cases (**1.2%** increase)
- The City of LA has **15.41%** of cases in CA with **941** new cases (**1.2%** increase)

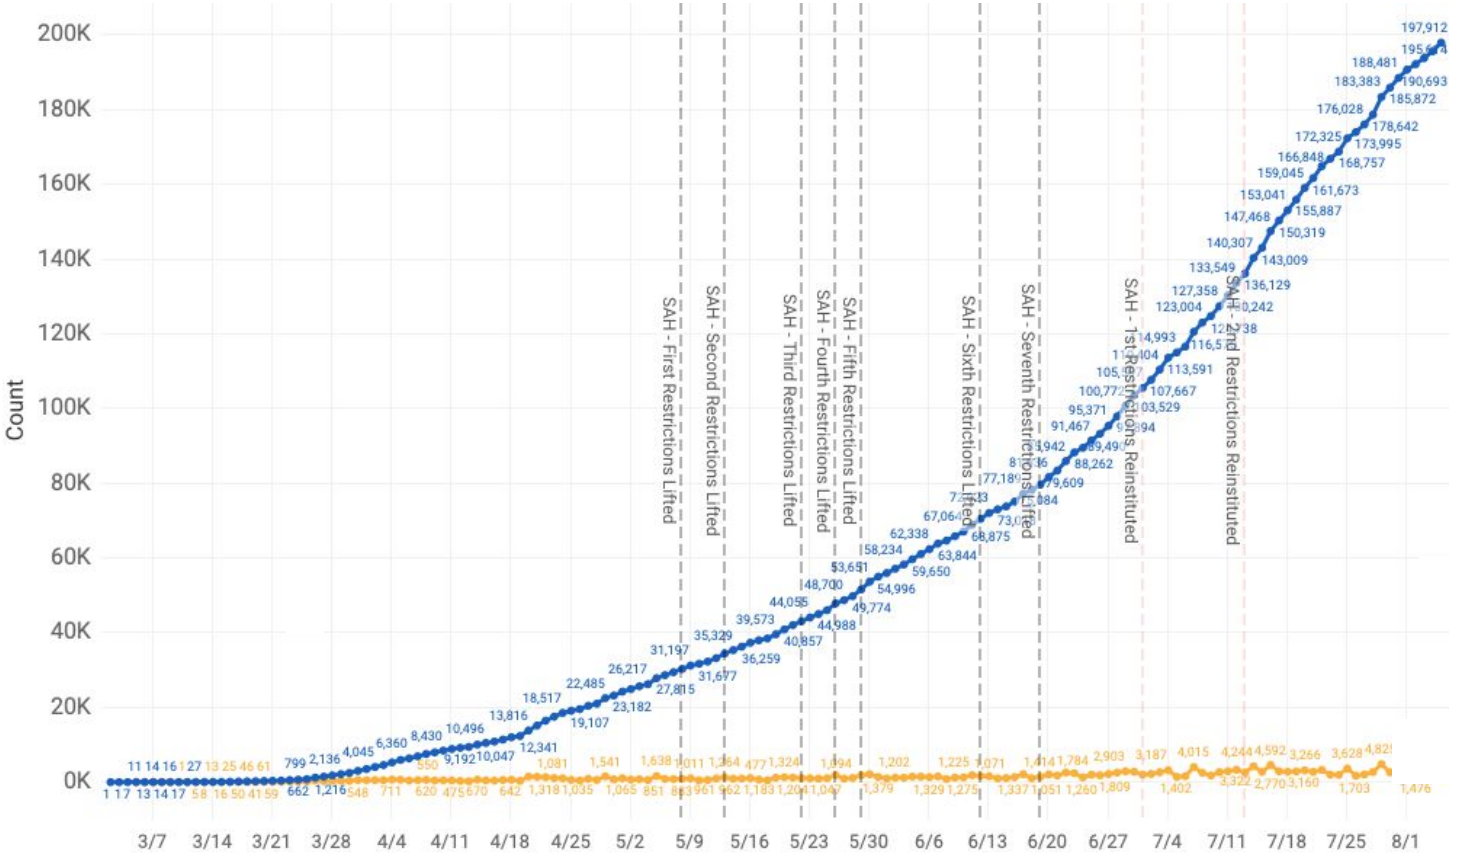
COVID-19 Los Angeles County Total New Cases

As of August 5, 2020, Updated 12:00 PM

Key Takeaways:
The past seven days have seen an average daily increase of 2,134 new cases

Note: *Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers*



Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

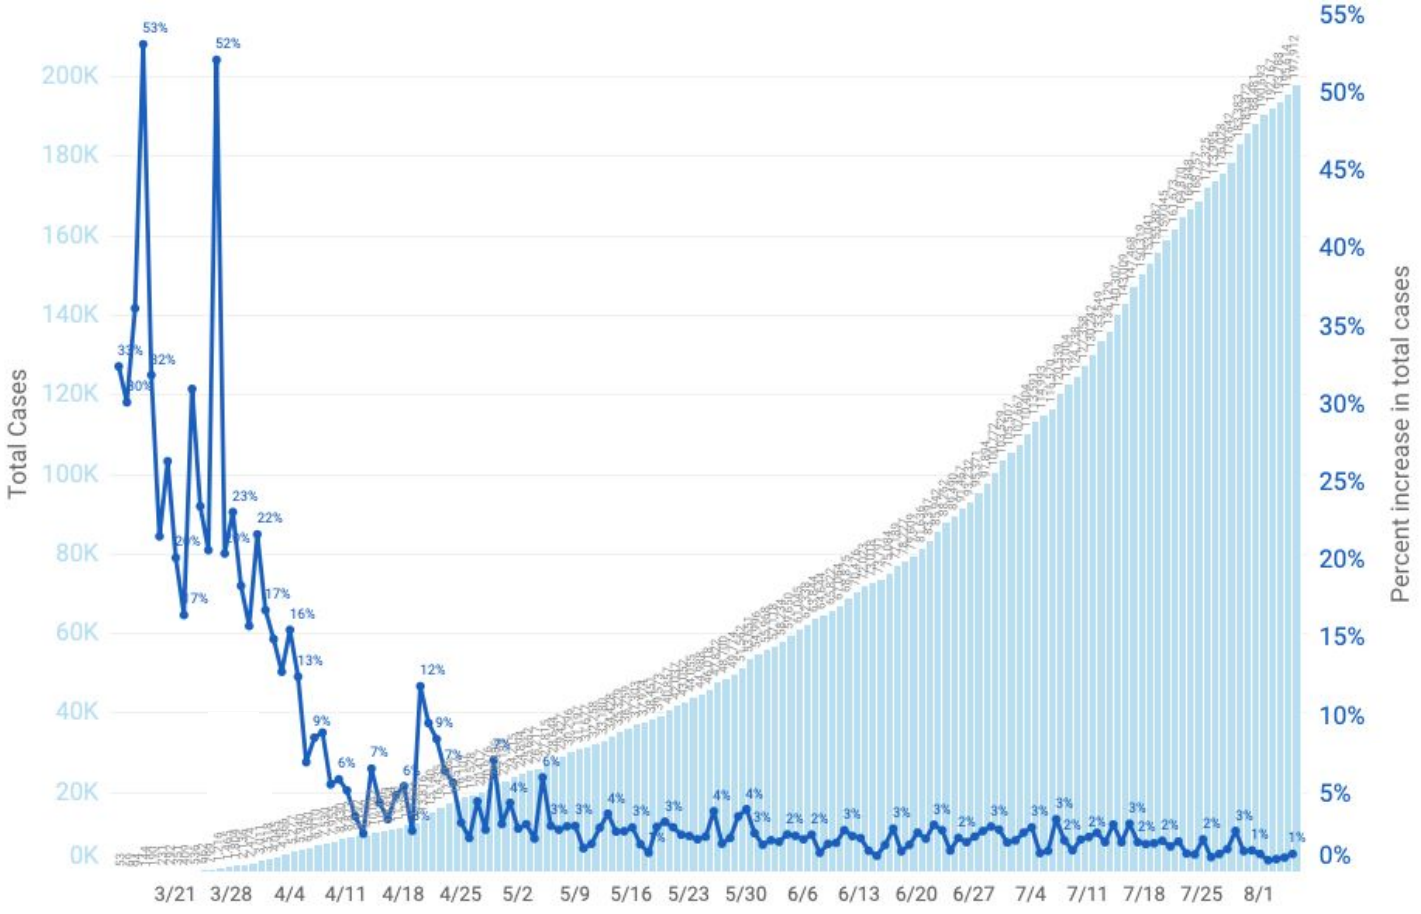
COVID-19 Los Angeles County Total Case Increase

As of August 5, 2020, Updated 12:00 PM

Key Takeaways

Yesterday saw a case increase of 1.2%

The past seven days have seen an average daily case increase of 1.1%



Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
