COVID-19 DATA SUMMARY

County Projections

Projections of Hospital-based Healthcare Demand due to COVID-19

This update includes data on hospital visits and volume through November 9, 2020.

KEY TAKEAWAYS:

• The number of new patients with COVID-19 requiring hospitalization each day across Los Angeles County appears to be gradually increasing.

• **The estimated transmission number ("R") is 1.03** with an uncertainty of 0.97 to 1.09. Last week the estimate was 1.02 with an uncertainty of 0.95 to 1.07. If R is above 1 the number of cases will increase over time.

• Based on the current estimate for R, it is likely that the number of cases will go up slowly. The current number of available hospital beds, currently staffed ICU beds, and available ventilators in Los Angeles County are likely adequate over the next 4 weeks.

• The model suggests that about **1 in 6 Los Angeles County residents have had COVID-19.**

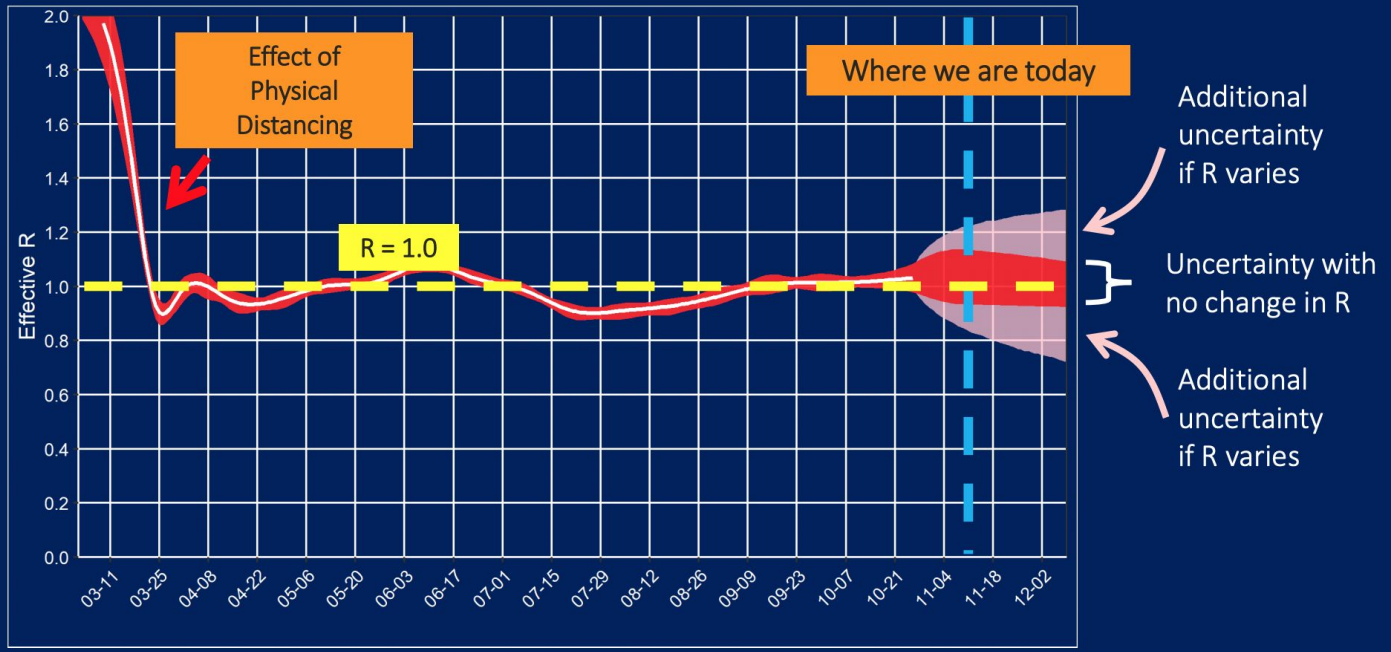
HOW MANY IN LOS ANGELES ARE INFECTIOUS TO OTHERS?

The model suggest that about **0.17% of everyone in Los Angeles County is currently infected and infectious to others** (uncertainty of 0.11% to 0.26%).

This suggests about **1 in 580 Los Angeles County residents are currently infectious to others** (uncertainty between 1 in 950 and 1 in 390). Last week this estimate was 1 in 670.

Effective Transmission Number "R"

As of November 9, 2020



Note: We have adjusted the R that we present to account for the fraction of the population that is presumed to be immune to reinfection. At the beginning of the pandemic, this fraction was essentially zero so this would not have made any difference. But as more people have been infected, and are presumed to have immunity, we are presenting an R that includes this factor.

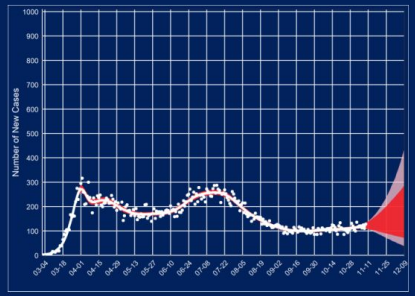
What about Influenza?

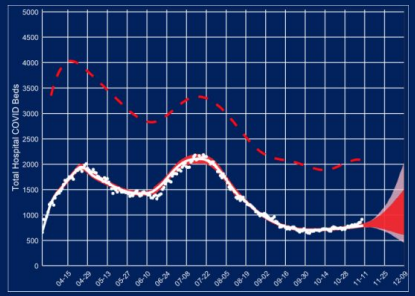
As of November 9, 2020

- Daily hospital admissions for COVID-19



- Typical daily hospital admissions for influenza-associated illnesses

- Hospital bed utilization for COVID-19



- Typical hospital census of patients with influenza-associated illnesses

• We have not yet seen significant influenza activity in Los Angeles County. The usual seasonal increase in utilization of hospital beds from influenza-associated illnesses is shown below. Influenza-associated illnesses typically lead to a demand for hospital beds similar to the current demand for patients with COVID-19. These estimates will be updated when influenza activity is detected.

COVID-19 DATA SUMMARY

Data Snapshot

STATE REOPENING METRICS

Explanation of metrics from the California Department of Public Health

New reopening metrics and tier assignment are announced on Tuesday

All metrics are evaluated on a 7-day lag

New COVID-19 positive cases per 100K
7-Day average new positive cases per 100K residents

Adjusted case rate for tier assignment
An adjustment factor for counties that are testing above or below the state average. This adjusted rate is used for "new case" metric rather than the raw case rate

Positivity Rate
7-day average of positive lab- confirmed COVID-19 cases divided by total tests

Health Equity Metric
The test positivity rate in the Lowest Healthy Places Index Quartile Census Tracts

METRICS As of Nov 10 2020, 1 PM	REPORTING DATE	RATE	% DIFF VS LAST WEEK	LAST WEEK REPORTING DATE	LAST WEEK RATE
New COVID-19 positive cases per 100K	11/10	11.5	-8.0%	11/4	12.5
Adjusted case rate for tier assignment	11/10	7.6	+1.3%	11/4	7.5
Positivity Rate	11/10	3.8%	-0.2% *(% Point Difference)*	11/4	4.0%
Health Equity Metric* (starting 10/6)	11/10	6.5%	-0.3% *(% Point Difference)*	11/4	6.8%

County risk level	New cases	positive tests
WIDESPREAD Many non-essential indoor business operations are closed	More than 7 daily new cases (per 100k)	More than 8% positive tests
SUBSTANTIAL Some non-essential indoor business operations are closed	4 - 7 daily new cases (per 100k)	5 - 8% positive tests
MODERATE Some indoor business operations are open with modifications	1 - 3.9 daily new cases (per 100k)	2 - 4.9% positive tests
MINIMAL Most indoor business operations are open with modifications	Less than 1 daily new cases (per 100k)	Less than 2% positive tests

CURRENT LOS ANGELES COUNTY RISK LEVEL: ***WIDESPREAD***

COVID-19 DATA SUMMARY

United States Update

COVID-19 US Cases - Per Capita State Comparisons

As of November 12, 2020, 3:00 PM • One-day lag

California has the most cases and the Midwest remains an epicenter. There have been recent increases in parts of the South and West as well. The top five states, based on overall cases include:

#1: 993.8K cases in Texas (+8.5K) - 3462 per 100K
19.1K deaths in Texas (+143) - 66.7 per 100K

#2: 991.6K cases in California (+6.9K) - 2506 per 100K
18.1K deaths in California (+38) - 45.8 per 100K

#3: 851.8K cases in Florida (+5.5K) - 3999 per 100K
17.6K deaths in Florida (+73) - 82.6 per 100K

#4: 545.8K cases in New York State (+4.8K) - 2792 per 100K
26.1K deaths in New York State (+29) - 133.3 per 100K

#5: 536.5K cases in Illinois (+12.7K) - 4211 per 100K
10.8K deaths in Illinois (+48) - 85.1 per 100K

Rounding out the top ten are:
Georgia, Wisconsin, North Carolina, Tennessee, Ohio

California ranks ...

COVID-19

LA County School Reopening Status

K-12 Schools - Schools With Limited Specialized Services & Assessments For High Need Students
As of November 6, 2020 (*new waivers announced on Fridays)*

Beginning September 14, 2020, K-12 schools in Los Angeles County were allowed a limited number of high-need students to return to campus for specialized support and services.

On October 27, 2020, the threshold was updated to modify the proportion of students who may receive specialized services on campus at any one time. All schools may have up to 25% of full student capacity on campus at one time. Following are the key numbers of schools and services, currently available.

For specialized in-person services

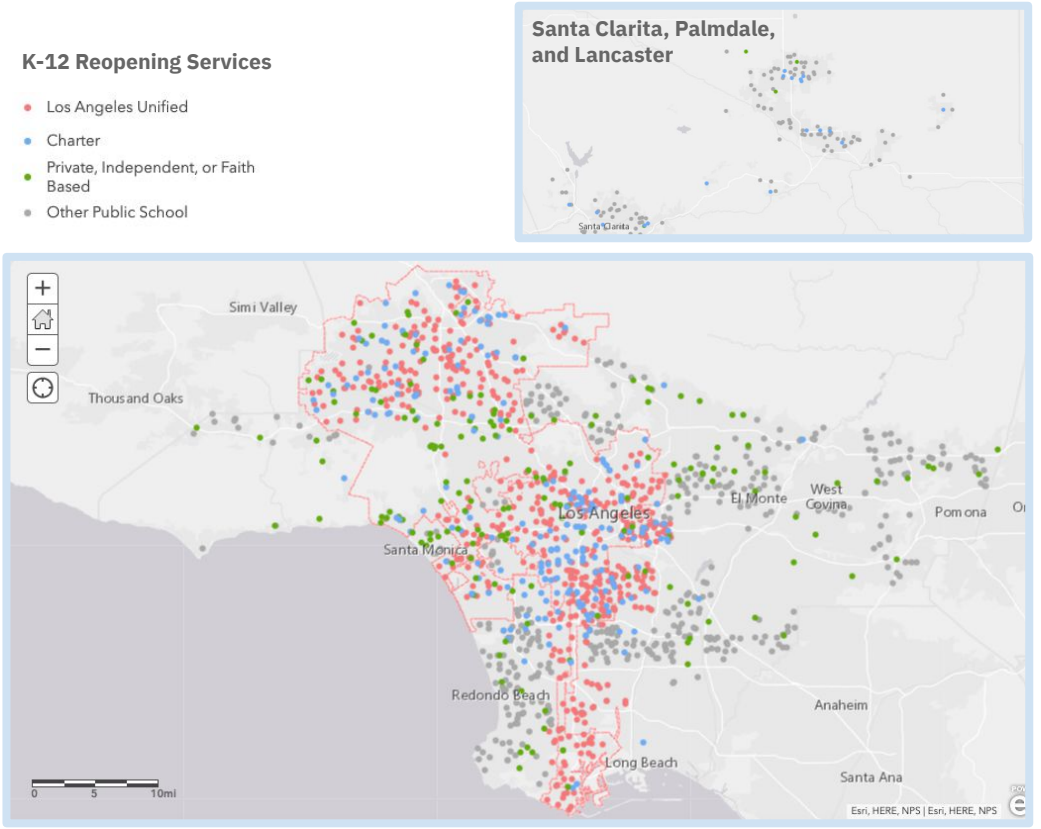
- **1,565** schools have been approved. In total, this affects
  - 75,211 students
  - 30,657 staff

Charter/private/public breakdown

- **73%** of the schools with in-person services are public schools
- **15%** are charter schools
- **12%** are private schools

150 cases have been reported among students and staff, but there have been only **12 outbreaks**

11 of those involved less than **4** people among staff. The one other outbreak was related to a sports team that traveled to Arizona for competition



Source: INSTRUCTIONS FOR COMPLETING K-12 SPECIALIZED SERVICES NOTIFICATION FORM; Reopening Protocols for K-12 Schools: Appendix T1; MAP: Services Notification Form Submissions

Special Need Waivers: TK-2 Schools Granted Opening Waivers
As of November 6, 2020

Each week, Los Angeles County will grant waivers for up to **50 schools** to conduct limited specialized services and assessments for high need students

- Schools which qualify for free/reduced lunch are prioritized
- DPH reopening protocol must be met with cleaning, infection control, distancing, etc.
- DPH staff will visit all schools to provide technical assistance

On *October 27, 2020,* the policy was modified, allowing schools to have up to 25% of full student capacity on campus at one time.

As of November 6, **74 schools** have received approval for **8,000 students. 81 schools in final pipeline**

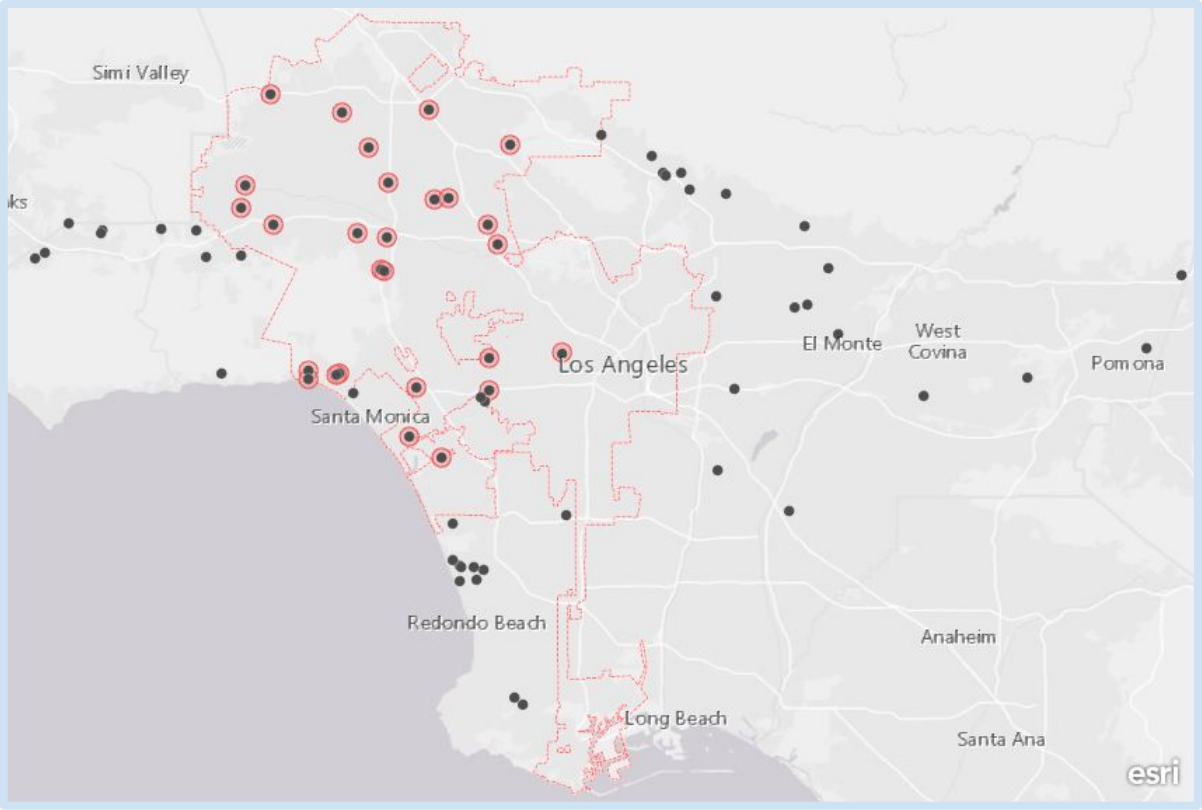
27 Schools are within the City of Los Angeles

As of November 12, over half of schools in **full compliance**

- 84% are in “good compliance”

238 TK-2 reopening waivers have been received

- 63% private
- 34% public
- 3% charter



Source: Reopening Protocols for K-12 Schools: Appendix T1; MAP: LA County COVID-19 School Waivers

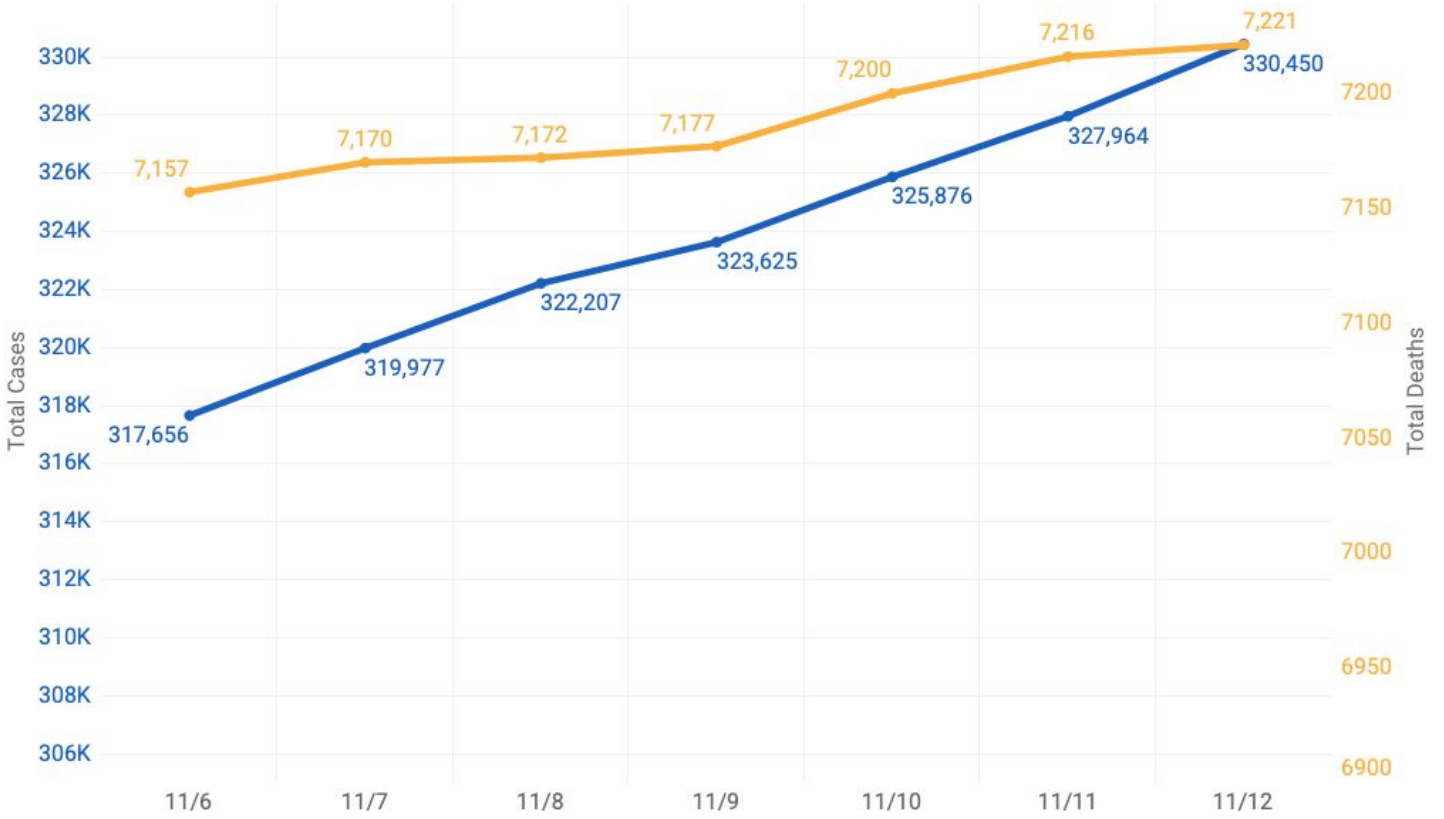
COVID-19 DATA SUMMARY

LA County Update

COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days

As of November 12, 2020, Noon

Key Takeaways:
Los Angeles County currently has a **2.2% mortality rate**. The estimated infection rate is 1.03 (*ideal is <1.0)*



Source: Los Angeles County Department of Health, COVID Tracking Project

Prepared by Mayor's Innovation Team

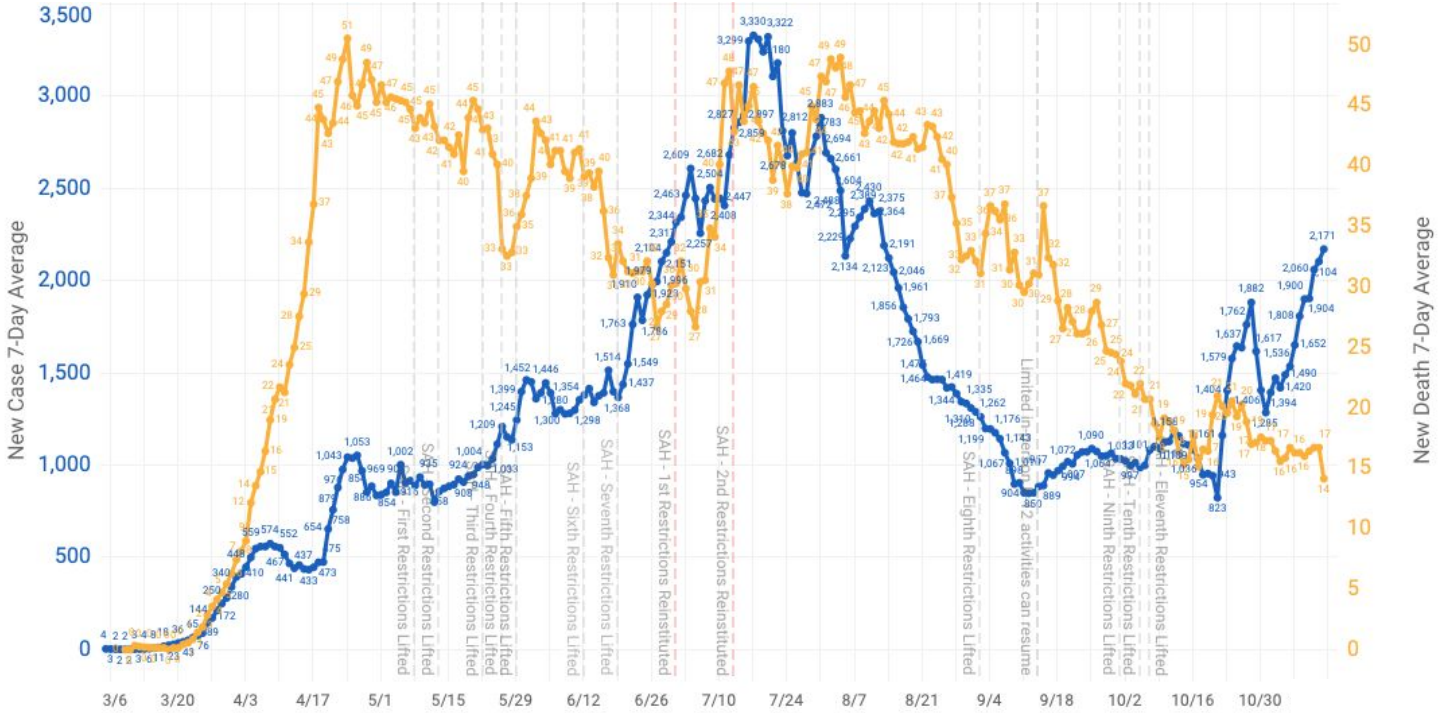
COVID-19 Los Angeles County New Cases and New Deaths, 7-Day Average

As of November 12, 2020, Noon

Key Takeaways:

The past seven days have seen an average daily increase of 2,171 new cases

The past seven days have seen an average daily increase of 14 new deaths



Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

New Los Angeles County case counts for 10/22-10/24 are inflated due to data backlogs from 10/17-10/21

Prepared by Mayor's Innovation Team

COVID Outbreaks at Non-Institutional Settings

As of November 11, 2020 • One day lag

Key Takeaways:

• As of November 11, there are outbreaks at 141 non-residential locations in Los Angeles with at least three cases for a total of 1,909 confirmed cases

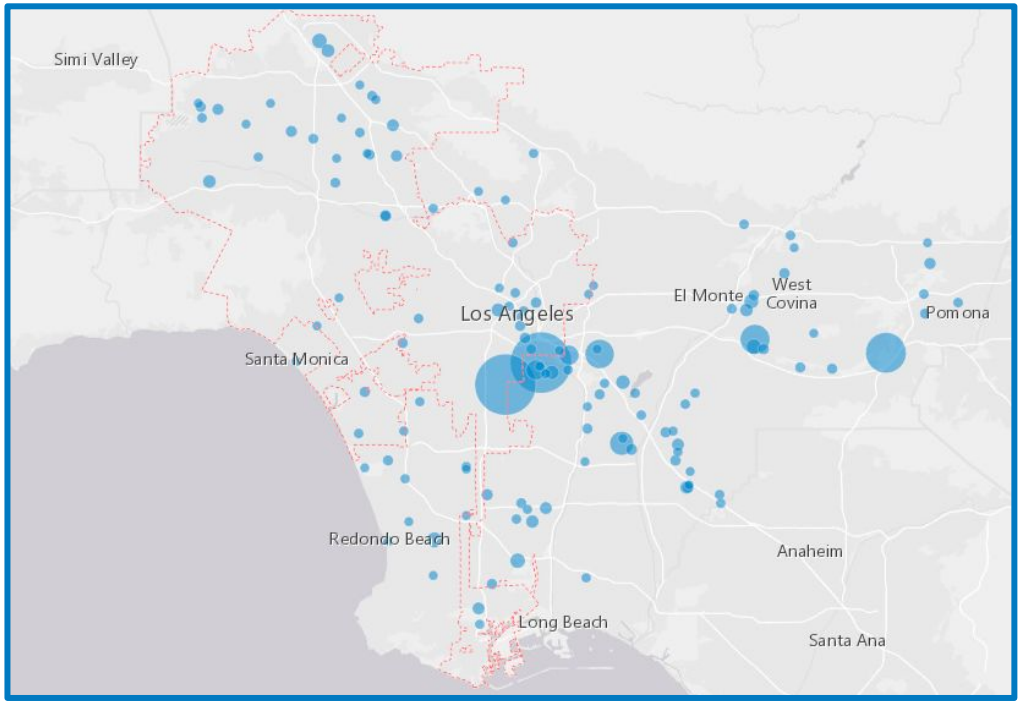
• The largest new outbreaks have identified at the following locations:

Bentley Mills LA in City of Industry - **71 confirmed cases**

Forrest Machining, Inc. in Santa Clarita - **17 confirmed cases**

MCI Foods, Inc. in Santa Fe Springs - **15 confirmed cases**

Total Transportation Services in Compton - **14 confirmed cases**



Source: Los Angeles County Department of Health

Note: the outbreak list includes Los Angeles County non-residential settings that meet the criteria of (1) five or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID19 case at a worksite, or (2) three or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a setting with vulnerable clients

COVID Cases and Death Demographics*

As of November 7, 2020 • Five-day lag

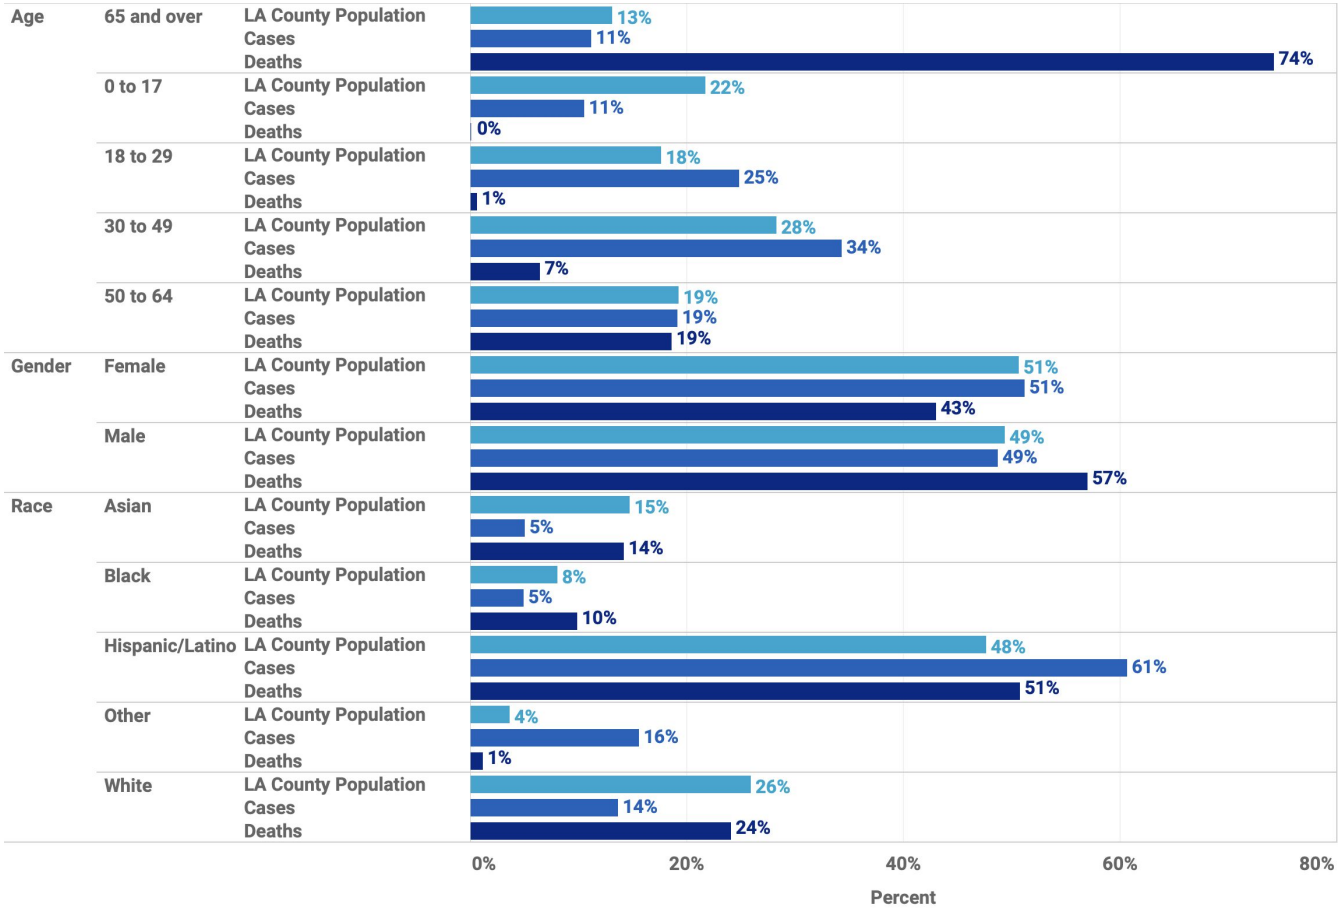
Key Takeaways:

• Data is incomplete with 34.9% of cases and 0.3% of deaths still under investigation

• People aged 18-29 and 30-49, and Hispanic/Latino Americans are overrepresented in cases

• Seniors, Men, Hispanic/Latino, and Black Americans overrepresented in deaths

• 6,709 out of 7,172 deaths had comorbidities (underlying conditions) (93.5%)



Source: Los Angeles County Department of Public Health, US Census Bureau

*Department of Public Health category *Under Investigation or Not Otherwise Listed* filtered out of analysis Approximations are made on Census data to accommodate county age buckets.

Percentage of cases and deaths under investigation is based on the race category

Share of LA County Deaths by Race

As of November 7, 2020 • Five-day lag

Key Takeaways:
From 5/1 to 11/7

- Hispanic/Latino share **increased by 12.8%**
- White share **decreased by 5.5%**
- Asian share **decreased by 4.2%**
- Black share **decreased by 2.7%**
- Other Races share **decreased by 0.3%**
- Native Hawaiian/Pacific Islander share **decreased by 0.2%**
- American Indian/Alaska Native share **increased by 0.1%**

COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases

City + County + State Daily Confirmed Cases, 7-Day Average

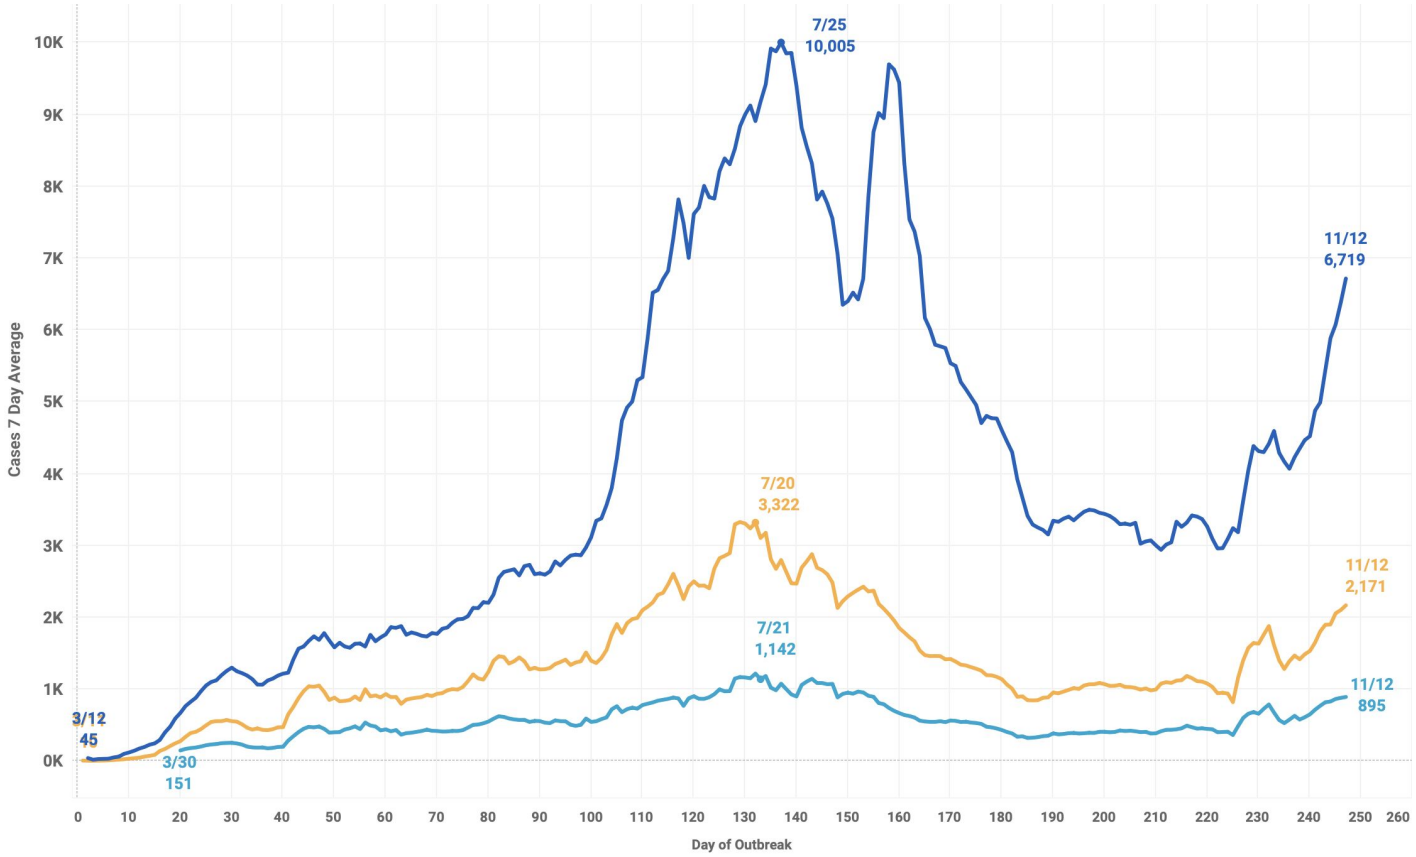
As of November 12, 2020, Updated 12:30 PM

Key Takeaways:

•An average of **6,719** Cases reported in CA from 11/5 to 11/12 (**0.7%** increase)

• LA County accounts for **33.3%** of cases in CA with an average of **2,171** new cases reported from 11/5 to 11/12 (**0.7%** increase)

• The City of LA accounts for **13.7%** of cases in CA with an average of **895** new cases reported from 11/5 to 11/12 (**0.7%** increase)



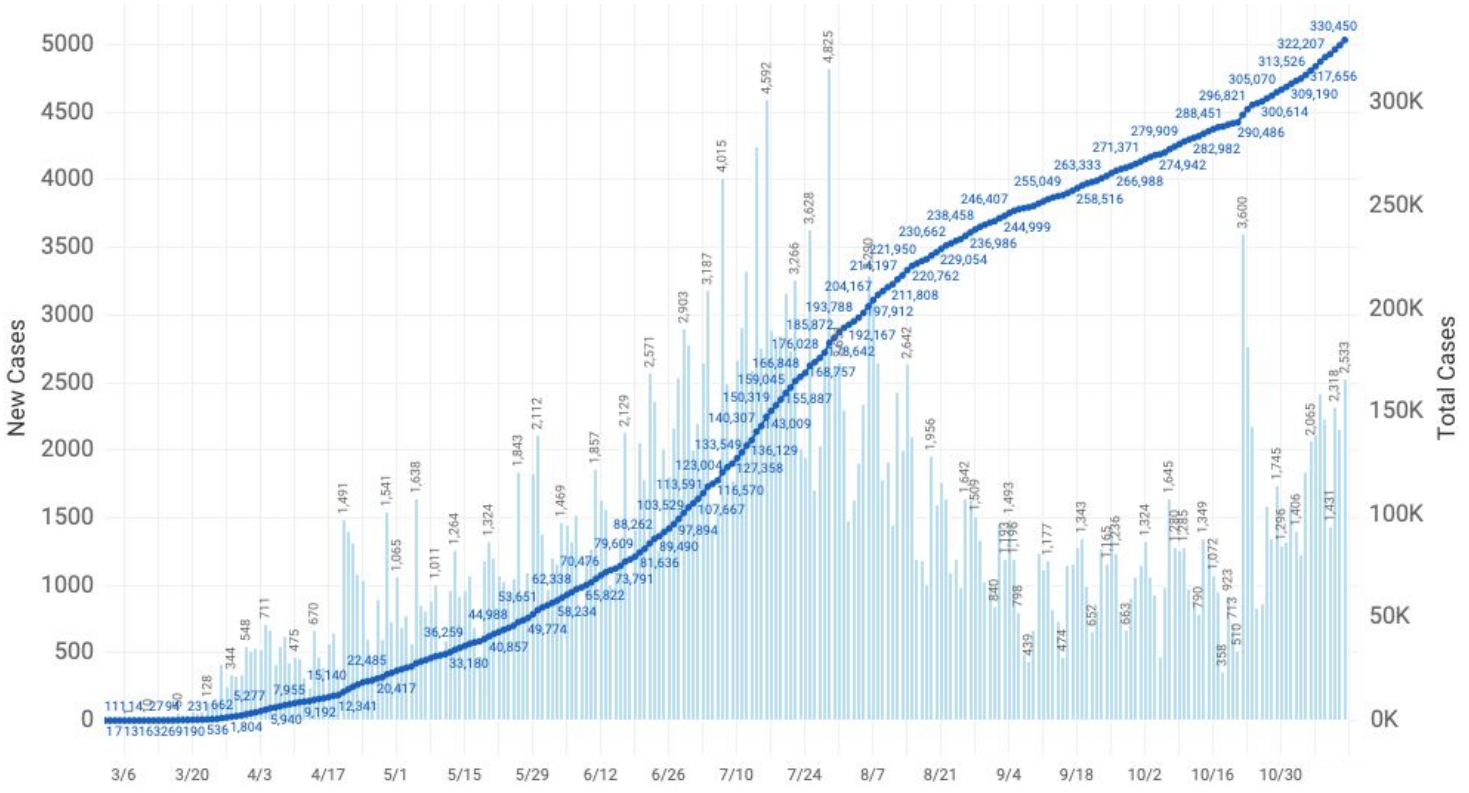
Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1

COVID-19 Los Angeles County Total and New Cases

As of November 12, 2020, 1:00 PM

Key Takeaways:
The past seven days have seen an **average daily increase of 2,171 new cases**

Note: *Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers*



New Cases
Total Cases

Source: Los Angeles County Department of Public Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. New Los Angeles County case counts for 10/22-10/24 are inflated due to data backlogs from 10/17-10/21

COVID-19 • LOS ANGELES COUNTY

Testing

City of Los Angeles* Daily Tests Conducted

As of November 11, 2020 • One-day lag

Key Takeaways:

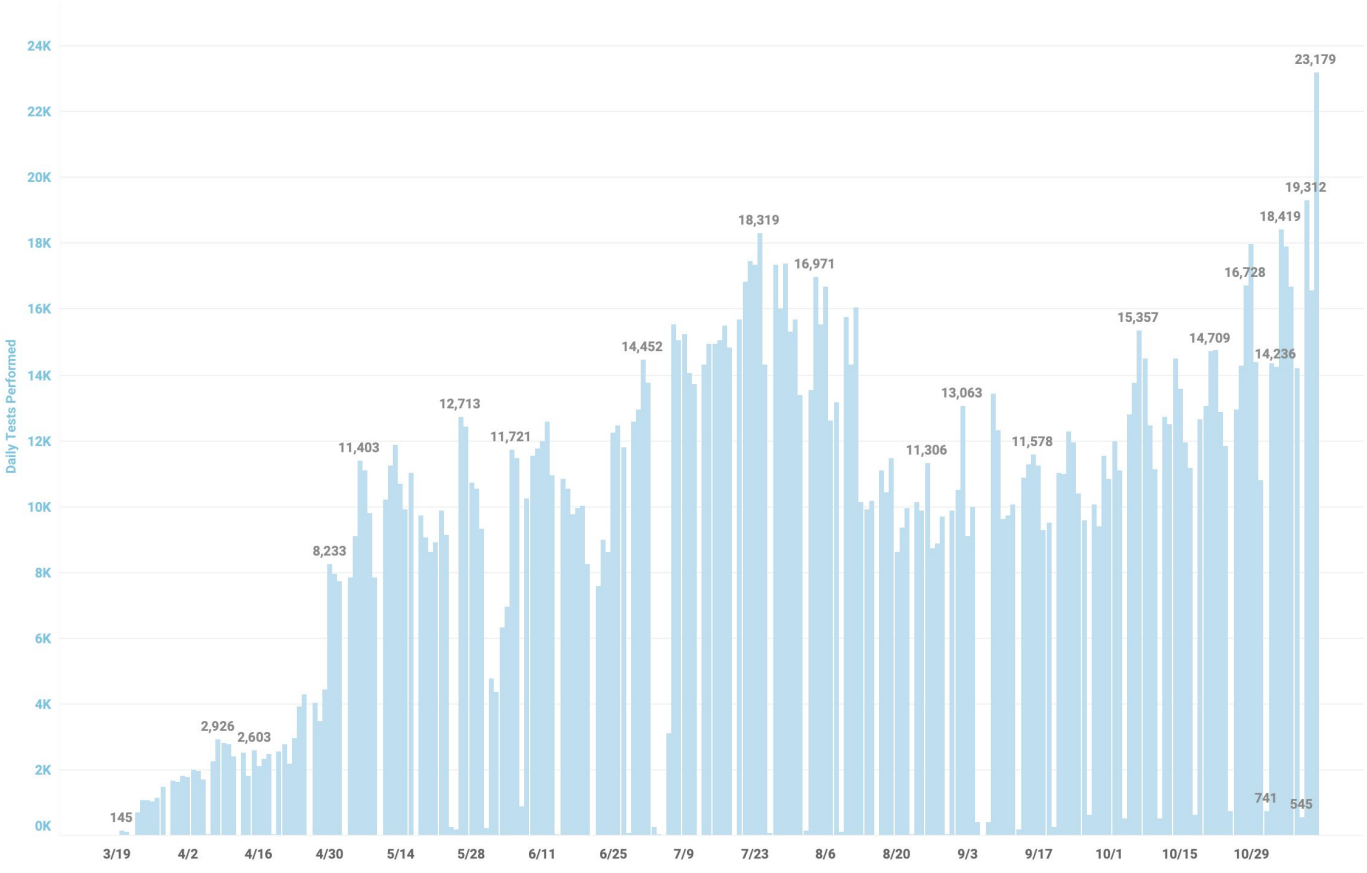
• **At least 2,057,878 tests** have been performed at City of Los Angeles since 3/20

• In LA County overall, at least **3,319,959** have been tested since 3/20

• **At least 23,179 tests** were performed on 11/11

• On average, **17,978** tests were performed each day from 11/5 to 11/11

•**126,054** of the 2,011,961 tests for which results were received were positive (6.4%)



Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor's Innovation Team

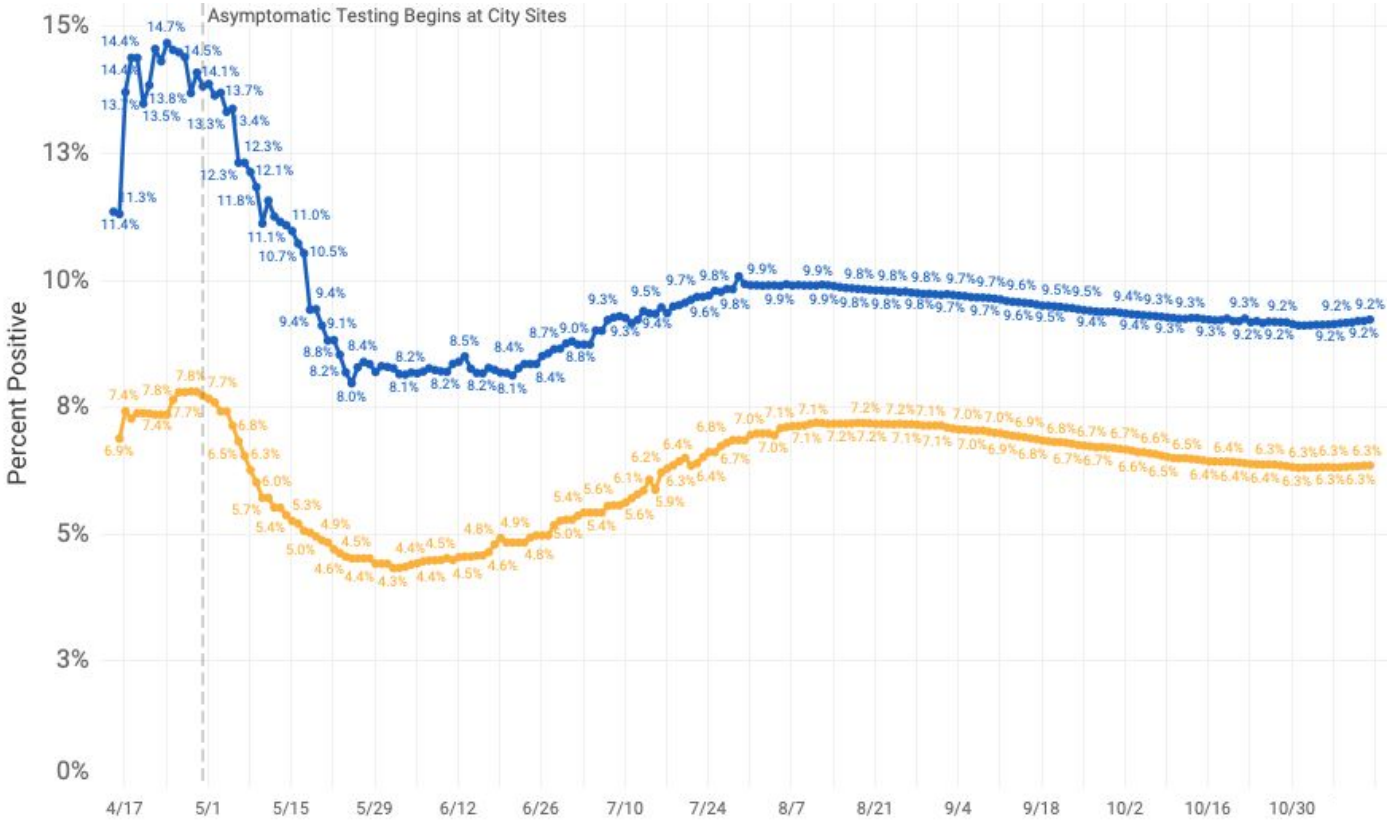
Positive Test Rate - Los Angeles City vs County

As of November 11, 2020 • One-day lag

Key Takeaways:

LA County's overall positive rate is currently at 9.2% *(for individuals tested)*

LA City's overall positive rate is currently at 6.3% *(for all tests)*



Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor's Innovation Team

City of Los Angeles* Tests vs Positive Rate

As of November 11, 2020 • One-day lag (for cumulative)/Two-day lag (for 7-day)

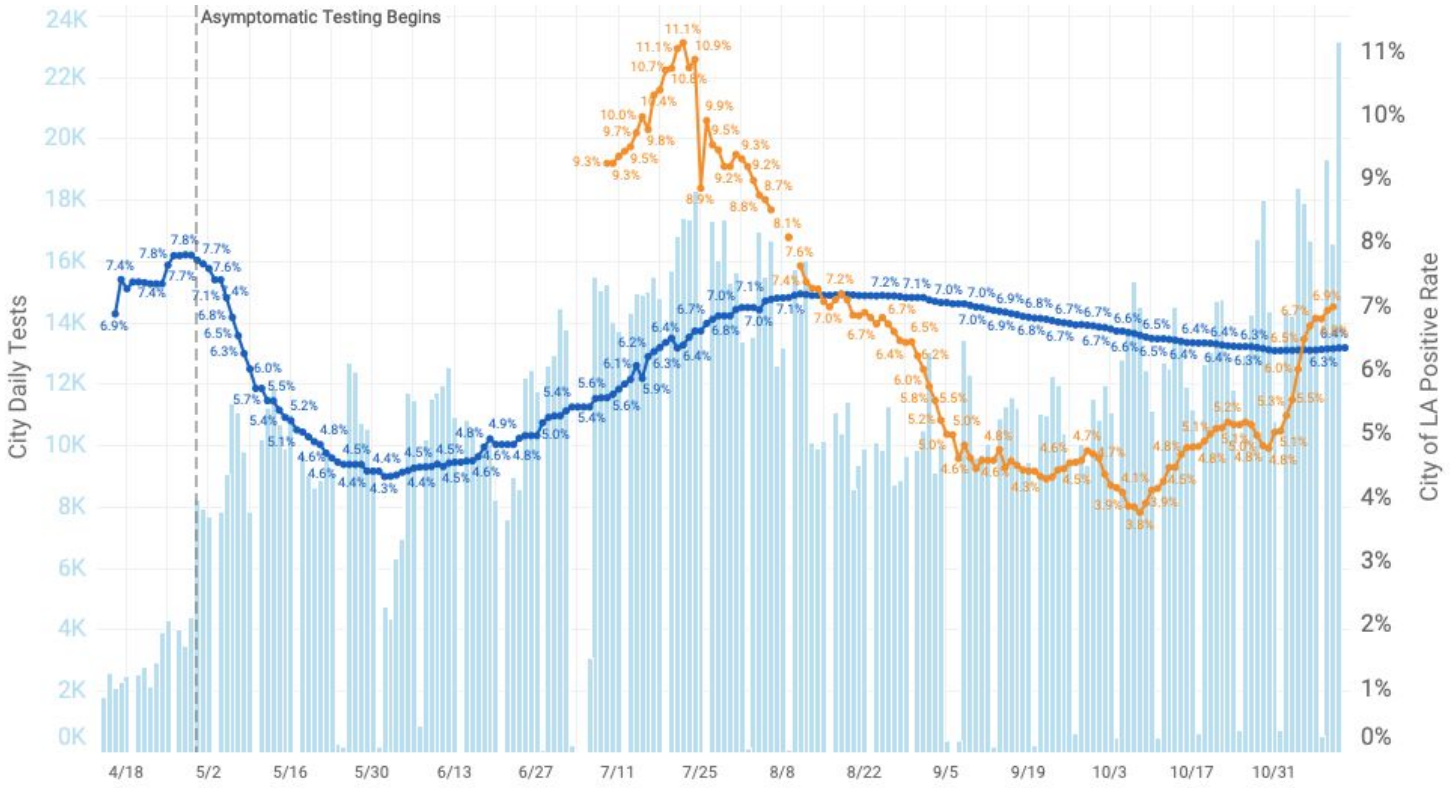
Key Takeaways:

• The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%

• The overall positive testing reached its lowest rate of 4.3% on 5/31

• The current positive rate is stable and is currently at 6.3%

• The 7-day positivity fell slightly to 7.0% (as of 11/10)



Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.

County of Los Angeles People Tested vs Positive Rate (for people tested by test day)

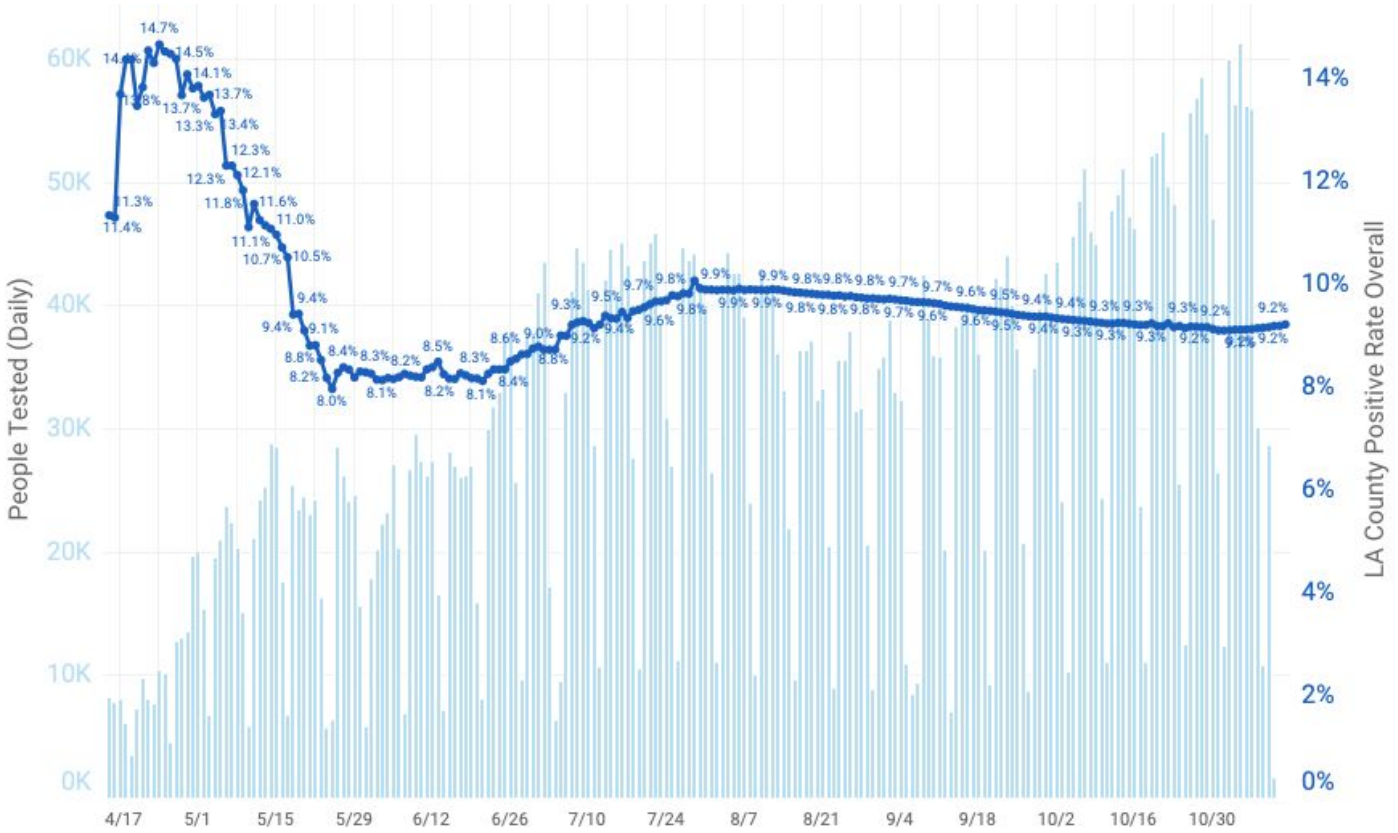
As of November 11, 2020 • One-day lag

Key Takeaways:

• The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%

• The positive testing reached its lowest rate of 7.7% on 5/27

• **The overall cumulative % positive persons tested as of 11/11 is 9.2%**



Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor's Innovation Team

County of Los Angeles Tests Daily vs Overall Positivity Rate vs. Seven Day Average Positivity Rate (Specimens) As of November 5, 2020 • One-week lag

Key Takeaways:

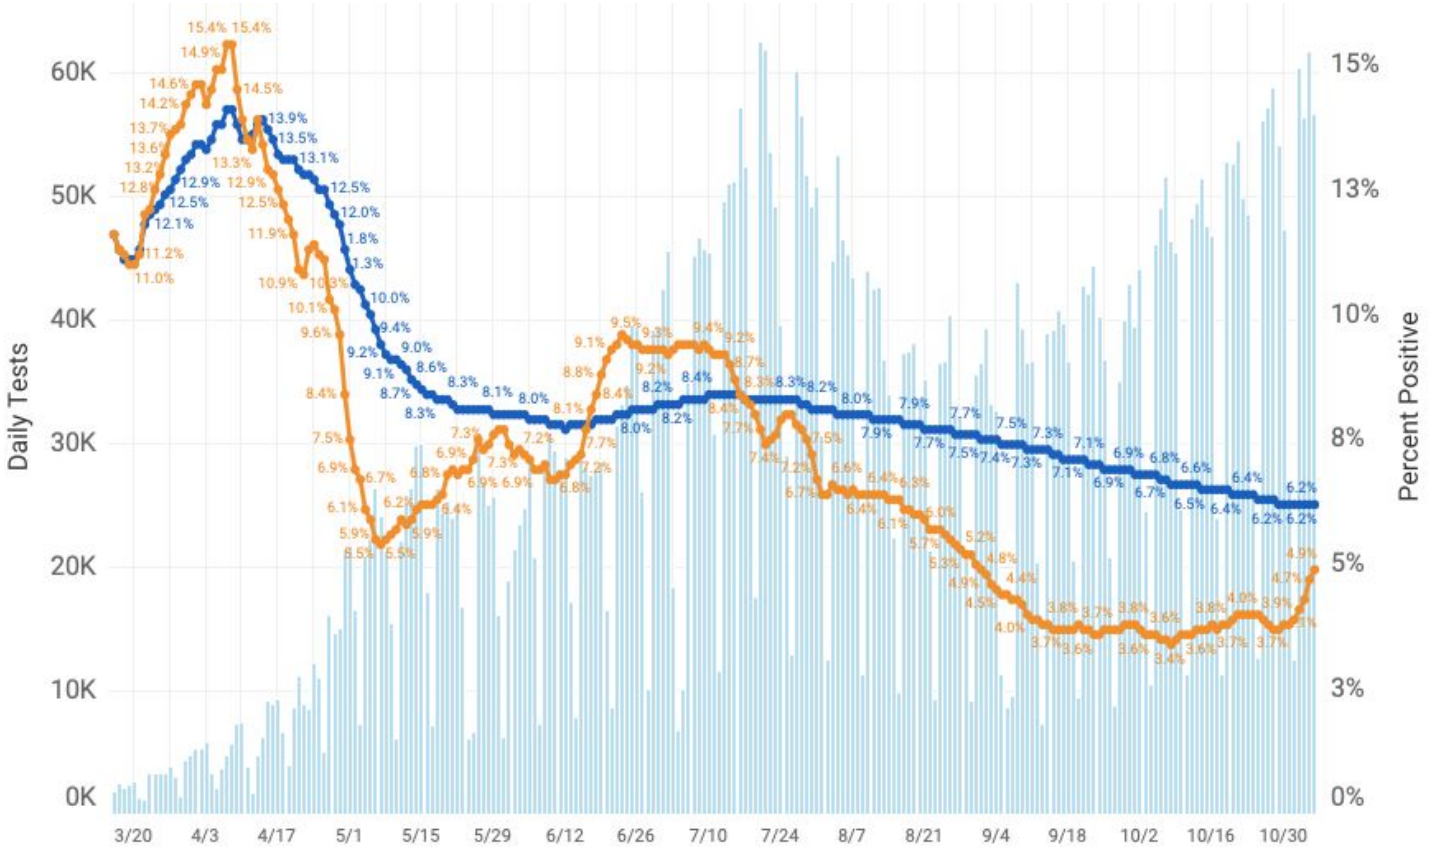
• The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%

• The positive testing reached its lowest rate of 7.7% on 5/27

• Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.

• The overall cumulative % positive rate of specimens tested as of 11/5 was 6.2%

• The 7-day average daily % positive specimen rate as of 11/5 was 4.9%



Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

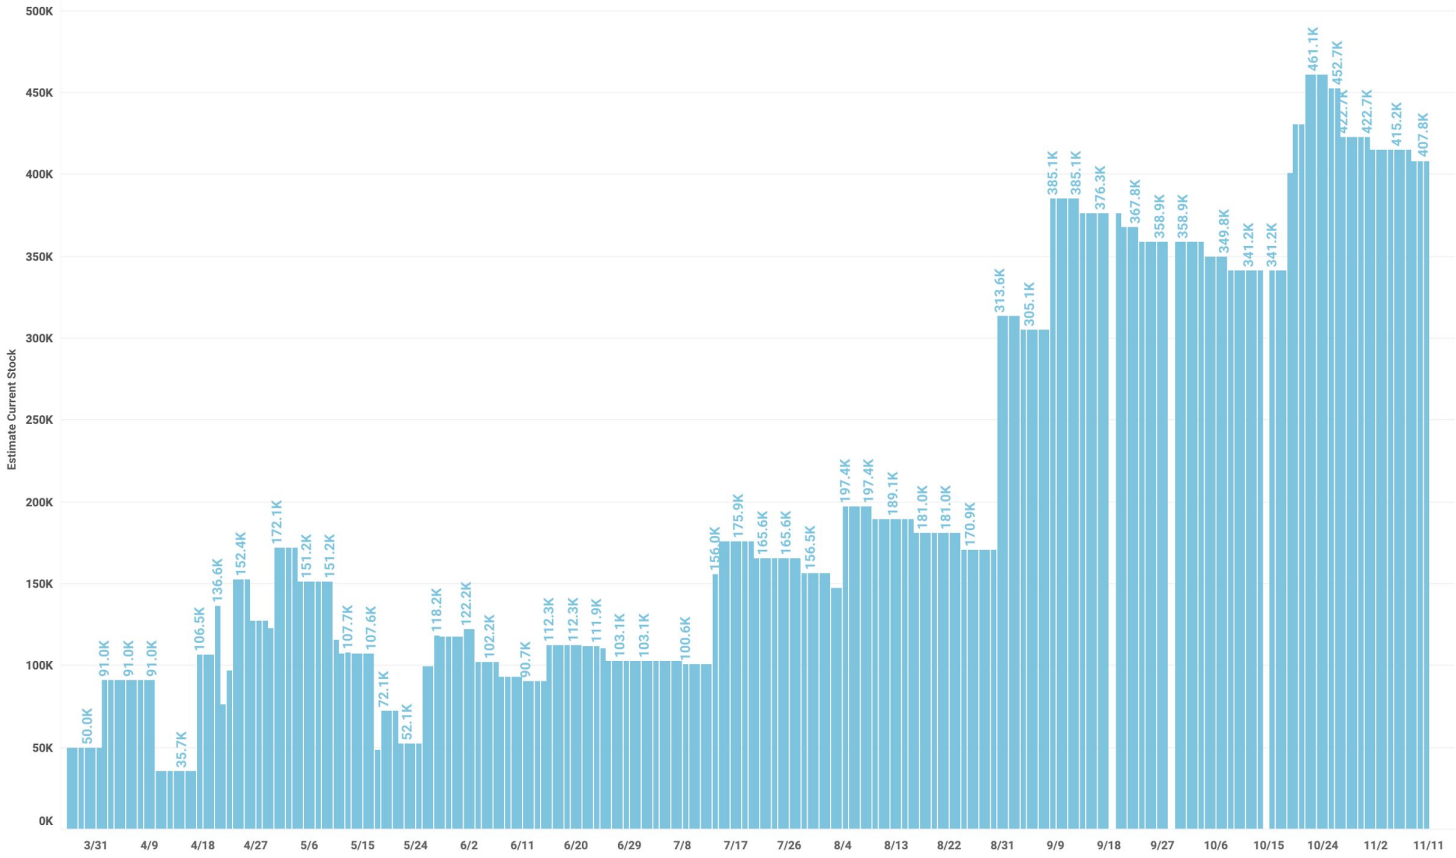
N95 Mask Stock: First Responders*

As of November 11, 2020

Key Takeaways:

- Current mask stock is **407,771**
- The stock of masks **decreased 1.8%** from last week
- The projected 3-month need is **660,765**
- The projected 6-month need is **1,387,607**



Source: Los Angeles EOC

** Includes LAFD, LAPD, RAP/Shelter Staff, Harbor, Personnel, GSD, Street Services, GSD, LAWA, ITA, DOT, Aging.*
*** The burn rate for LAFD decreased due to revised standards for reuse. LAPD burn rate = 1000/day; LAFD = 1500/day; LAWA=1875/day.*
**** The six-month need is more than double the three-month need because departments estimate that their burn rate may increase with time.*
