Los Angeles schools and teachers’ union agreed to reopen classrooms.
New reopening metrics and tier assignment were previously announced on Tuesdays. On November 16, the State announced that it may start reporting metrics more frequently and on days other than Tuesdays.

All metrics are evaluated on a 7-day lag. Current data range: 2/21/21 - 2/27/21

**New COVID-19 positive cases per 100K**
7-Day average new positive cases per 100K residents

**Adjusted case rate for tier assignment**
An adjustment factor for counties that are testing above or below the state average. This adjusted rate is used for “new case” metric rather than the raw case rate.

**Positivity Rate**
7-day average of positive lab-confirmed COVID-19 cases divided by total tests

**Health Equity Metric**
The test positivity rate in the Lowest Healthy Places Index Quartile Census Tracts.

COVID-19 • CITY OF LOS ANGELES

Actions This Month
1st March

The City vaccination sites expanded their eligibility to align with the County Public Health guidance. The update allows those in Tier 1B — workers in food and agriculture, education and childcare, and emergency services and first responders — to make first dose appointments.

4th March

Mayor Garcetti announced the opening of the City’s newest vaccination site at the University of Southern California (USC). The site will have the capacity to vaccinate up to 5,000 people a day. To expand access to the site and ensure Angelenos without a car can still get vaccinated, the City and the Mayor’s Fund for Los Angeles have partnered with Uber on a new initiative to bring South L.A. residents to USC for their vaccination appointments.

6th March

Mayor Garcetti announced that Los Angeles has administered half a million doses of the COVID-19 vaccine across all City-run sites, a critical milestone in the fight to end the pandemic. Three months after kicking off this effort, the City has stood up six fixed vaccination sites, deployed seven mobile clinics, and administered a total of 511,698 doses to Angelenos, approximately 96% of its received supply, and representing more than 20% of the total vaccinations administered in L.A. County.
